THADOMAL SHAHANI ENGINEERING COLLEGE
COMPUTER ENGINEERING DEPARTMENT
ACADEMIC YEAR 2026 - 27

T.E. Computer (NEP) **Semester: V**

List of Experiments and Assignments
Subject: Software Engineering Lab (2115117)

Sr. No	Experiments
1	Write a detailed Problem Statement for any case study. Justify which process model would be best suited to apply on it.
2	Develop SRS document in IEEE format for the case study.
3	Draw class diagram and use case diagram using any opensource tool.
4	Draw DFD for case study using any opensource tool.
5	Develop Activity and State Transition diagram for the project using any opensource tool.
6	To Study software estimation techniques like Function Point Analysis and COCOMO model and calculate the cost for case study.
7	Use project management tool to schedule project plan for a case study.
8	Develop a Risk Mitigation, Monitoring and Management Plan (RMMM) for the project.
9	Case Study: GitHub for version Control.
10	Develop test cases for the project using White Box testing.
	Written Assignments **Assignment 1:** Q.1.Architectural Design: Explain in detail each type with examples. Q.2.Explain Concept of Cohesion and Coupling with example. **Assignment 2:** Explain in detail: a) Software Maintenance b) Re-Engineering c) Reverse Engineering

Subject In-Charge
